Maybe you should keep it for you, friend .. worked in the United Kingdom 2007/8 could not believe that Brits was still using the stuff. Then for the corners it is only free air until the next straight length. I'm sorry to have pressed some incorrect quotation buttons, etc., I'm new Damn, reports the memories that I would like to have a going to bend the conduit. This is a large post and useful stuff in what is becoming a dying art. At the time I was an apprentice, I was shown to me only for my interest. He made me smile. Some of the most young boys in different units could not complete the steel duct and had to end up in PVC. There seem to be US guides but nothing for the United Kingdom. Attached is a photo of some recent works in the rear room of a church, for the most 32mm, with a little 25, and 20mm. Yes, I did it last week on 2365 and I understood that yesterday I had completely forgotten it, so I want some written references, I could end up renting a bending machine and buying some lengths of duct I have the 4 jib/ books CITB, since I was an apprentice and show how to make a trunk curves and how to fold the conduit. Unfortunately both books and most of the Google research are based on the American method of bending Conduit and seems to be very different in my limited experience with the steel conduit there is no substitute for practice I have training books On conduct, tray and a lot of other things since the 80s when I was an apprentice under Citb / Jib but the books go hand in hand by working on the site with an expert electrician showing the road to bend and form the conduit. Then he had a perfect sense. The site was lucky to have Hilmors so that it is what was taught me mainly to use. There is a little more than being blocked. It is because it is a secret that He kicked, I watched the benders on the internet. Thanks for the information guys, im a student and the last problem I had was the bending machine and find the bending point, one of my i noc ottaf osseps "A oiaicca'l otazzilitu eneiv odnauq e emrone Atitnaauq anu otazzilitu eneiv CVP li ,onrotni iuq otrom Aip ol rep A .ottepsa'leb nu am ,ottut etnematepmoc iggel non ,erongis ,eizarg ,itulaS .otitserp ni iserp irotamrof id tes nu noc asac a olodnageip e oizogen nu ad ezzehgnul enucla odnenetto eradnoffa rep e olarapmI elicaf ^Aip otlom otavort oh ,ortla'llad irouf e oihccero nu ni 'op nu ni otadna "A ,5632 lus isodnageip ottodnoc li ottaf oh odnauq arocna eizarg idniuq ,evruc el odnamrof Atlaer id allun am ,edlig elled e Attic alled etnegilletni omrehcs elautta'llen otseuq id' op nu "A'C .asoido aboR .ollatem id ottodnoc len egarag ous li eraf otats "A ottaf ah ongapmoc nu ehc ovarb onu a eizarG .otis leuq us itnatsartnog otlom AtilibA .osrevid ais otnaauq etnasseretni aznatsabbA .isrageip elicaf Aip "A idniuq ,ertson ella ottepsir ilittos ^Aip iterap ehcnA ah ottodnoc led "obut" li ~AL .eranivodni id onem 'op nu E .cce isicrp ^Aip' op nu irtsiger i o ocol ni adiug al emoc elibinopsid eresse ebbervod otseuq ehc otneS .resal nu noc attor aretni'l rep erotaiznatsid led elles el ettut eratsopmi ,ottut id amirP .etnatropmi .ilgatted itlom ecsidnoforppa 61 n tsop len knil II .ettircs ediug olos "A'c non ehc ellof' op nu arbmes otinU ongeR li rep am ,isnetinutats ediug el emoc ^Aip id asoclauq ni onareps ehc itnasseretni esoc enucla ikoL@ .otecaf etnemralocitrap ozzagar nu ad otangesnog oveva ol ,otseuq oveva oi'hcnA .otazzilaer odnauq elles ella onif vlaG ottodnoc la erirffo ad iah ehc "A ottepsa'l ecaip im non iuc id ,enoizucece ni itnuig id osu'l etrap a "A asoc artla'L .ottodnoc li erageip emoc e gniknurt id evruc el eraf emoc erartsom e atsidnerppa nu ore odnauq ad ,BTIC/bj ad irbil 4 i oH .Atirev al as is es onisac elat ni "A ocoig li ©Ahcrep occE .alorapassap li osrevartta attaf eresse arbmes ottodnoc led enoisself rep adiug al attuT .alleuq emoc etnartsurf asoc "A em rep am ,oihcco rep ottut af e zziw nu "A ottircs ottircs nu id acrecir allA .v ,ibut i aremasir ,etnemarucis E .etnasseretni arbmes otinU ongeR led ottodnoc li ebberehgeip isnetinutats rezneb ieuq id onu es odeeihc iM .evruc ehc otsottuip alotacs ni artsed a eralogna e Although ancient there must be something written with guidelines, angles etc. Or in a book, but if you really want books to do a proper apprenticeship with a jib company. If they use it, it's a multi-core cable, not single running inside. I suspect India and Australia are the same as the United Kingdom, but they were unable to find any information on the common method in Europe. Although I am lucky if I touch the metal duct more than a handful of times a year. The best way is just to try, the steel duct is very fun. Any chance you or anyone else can upload these if not someone had the full name of these books so that they can look around me. He's coming back as they often do. I'm what they call a cynesthetic student, I learn by hand and doing. Can this publication still be coming? I've never seen a used scaffold card. When I did a conduit bending on 2365, it went into one ear and out of the other, I found it much easier to learn it and to sink getting some lengths from a store and bending it at home with a set of trainers borrowed. Steel pipeline used when I was an apprentice over 40 years ago. Go to Looks like you're back a little bit. Long life plastic impact. If you understand, the rest follows and looks good. So if someone can indicate being in the direction of a copy of these jib/citb books for apprentices that would be very useful. Crickey! Who uses steel duct these days? Missing is fine, but as you can see from the SINTA loading measurements and angles specified for double and saddles etc. It is a difficult subject and seems to be very oriented to experience. Something like that sounds good, do you know the name of the training books? Nostalgic kicked in where I tried non e orter lus atrop al osrevartta ocoig otseuq ni erartne id onacrec ehc enosrep etlom A .~As dradnats revop nu a ottaf "A osseps acitetse'l rep etnemarup otazzilitu eneiv evod itnarotsir e adarts atla id izogen ieN osse ni asoclauq eresse ebbertop ic ,inroig itseuq ni ottodnoc led itnaipmi inucla id dradnats ol otad ,et dnep..... tenretni us irotageip i odnadraug otats onos em a aiv li otad ah aiglatsoN .osrevid ais otnaauq etnasseretni otloM 2 anigaP ..ossop odnauq ,olrallatsni arocna ecaip iM .itarofrep irof id oiap nu e ongel id aicnalp anu ad asac ni ottaf arutageip id occolb nu otasu oH .tsop 4x 4 nu are otasu oh ehc occolb omitl'u'l ,otis led azneirepse'l rep otutitsos nusseN .elicaf ^Aip otlom "A enomit nU ?arutageip id occolb nu otasu iam ah onusseN .etnerom etra'n u' odnatnevid ats ehc olleuq ni elitu abor e tsop ednarg nu "A otseuQ ?iuq otacrem noub a av ehc etneced ageip ehclauq 'e'C opocs ol rep TTO es ehcnA ,enoizallatsni odnacrec ossa nu noc otinif e acitarp anoub id' op nu oH .otlom onasu en non ,otsiv oh ehc olleuq aD .ruomliH nu otasu oh ,inna ad ,^Arep ,olrettemma oveD .eizarG ?etnerom etra'n u' odnauq aD .odlac opport ebberas erolac id ivac ied asuac a ,eera etlom ni ,oiggetnop ,ottodnoc ,oiaicca id osu'llad onognetsa is ,idlac iseap ied etrap roiggam al emoc tixerB noc odnedeccus ats asoc eripac omaissop non elanoidirem orefsim'e'led onos iop aM .azneirepse de acitarp olos ,^Arep osse id us aruttel anucla ottaf iam oh noN .ottodnoc led enoisnemid al rep arutaizaps id loclac i ottaf reva id ivetarucissa E !vlag ottodnoc lad etarapes onos ehc idarg 09 id evruc erasu noN .enif al osrev etnetrevid otlom - eraihccadir oser ah im olif otseuq ottuT .itua otseuq ehc oreps arolla odnacrec arocna iats es am ,tsop oihccev nu "A otseuq ehc os ,oaiC .osocitaf etnemralocitrap ozzagar oihccev nu ad em a otangesnog isseva ol es oi'hcnA oveva oL ?arutageip id occolb nu otasu iam ah onusseN .tenretni us icirtageip Work for apprentice money and put the first learning. They do it but not very well, since they are imperials of size so curved curves become a little deformed. The best way is Try it, the steel duct is very fun. I thought I'd take off the webs and take off my sego because I still have my supplies and dies and a stop. I also appreciate the original diagrams they discover. Has anyone had any idea about the methods used in Europe or elsewhere in the world? After a closer look at some of the American guides, there are some useful things on corners etc. Which can be used, I wonder if one of those U.S. Benzers would fold the UK conduit looks interesting. I made a fashionable kitchen in Galv no long ago. And a commercial project at the Bristol Pier for coffee and so on. I would recommend to the OP to take one, a little led and play. This is a public forum after all. I have training books on the conduit, tray and a lot of other things in the '80s when I was an apprentice under CITB / jib but the books go hand in hand working on the spot with a qualified electrician who shows you the way to bend and form the conduit. Looking for a written guide to fold the conduit. I have training books on the conduit, tray and a lot of other things in the '80s when I was an apprentice under CITB / jib but the books go hand in hand working on the spot with a qualified electrician who shows you the way to bend and form the conduit. I may have moved you somewhere new... new...
